Re: Surface Water Permit No. S3-30490

Dear Mr. Walker:

Enclosed is your permit to be retained for your records. Please read the enclosed information sheet, as well as your entire permit.

This permit authorizes you to construct your project and put water to use.

We are enclosing a *Construction Notice* form. Once you begin construction, complete and submit the form to this office. **If you cannot begin your project by January 2, 2016, you must contact this office to apply for an extension.**

If you have any questions, please contact Kevin Brown at 509-329-3422.

Sincerely,

Karen Tusa  
Water Resources Program  
Eastern Regional Office

PERMIT

### Proposed Works

A new diversion structure, pipeline, and delivery system to serve five new parcels to be developed on the property

### Development Schedule

BEGIN PROJECT	COMPLETE PROJECT	PUT WATER TO FULL USE
January 2, 2016*	January 1, 2017	January 1, 2020

\*Prior to construction of the diversion facility or pipeline, the permittee is required to obtain Right of Way Agreements and/or easements, complete local County SEPA process and obtain Plat approval. These documents shall be completed and submitted with the Beginning of Construction Notice.

### Measurement of Water Use

How often must water use be measured?	Weekly
How often must water use data be reported to Ecology?	Upon Request
What volume should be reported?	Total Annual Volume
What rate should be reported?	Annual Peak Rate of Withdrawal (gpm or cfs)

### Provisions

The diversion structure must be developed below and downstream from the existing spring diversion box and pipeline overflow established for the Lower Slumber Domestic Water Association (LSDWA, S3-25934C).

### Measurements, Monitoring, Metering and Reporting

An approved measuring device shall be installed and maintained for each of the sources identified by this water right in accordance with the rule "Requirements for Measuring and Reporting Water Use", WAC 173-173.

WAC 173-173 describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition the Department of Ecology for modifications to some of the requirements.

### Department of Health Requirements

Prior to any new construction or alterations of a public water supply system, the State Board of Health rules require public water supply owners to obtain written approval from the Office of Drinking Water of the Washington State Department of Health. Please contact the Office of Drinking Water prior to beginning (or modifying) your project at DOH/Division of Environmental Health, 16201 E. Indiana Avenue, Suite 1500, Spokane Valley, WA 99216, (509) 329-2100. The design and construction of this system must be approved in writing and approval of the design must be submitted prior to Beginning of Construction.

**Permits, Easements and Right-of-Way**

The water source and/or water transmission facilities are not wholly located upon land owned by the applicant. Issuance of a water right authorization by this department does not convey a right of access to, or other right to use, land which the applicant does not legally possess. Obtaining such a right is a private matter between applicant and owner of that land.

The following authorizations are required prior to any construction of the diversion facility and are required to be submitted as part of the Beginning of Construction of this authorization.

The permittee is required to acquire and submit a Special Use Permit from the U.S. Forest Service authorizing the development of the easement, diversion facility and pipeline. This authorization must be submitted to the Department of Ecology prior to any construction.

The permittee is required to submit a written authorization (easement) from the Department of Transportation authorizing the development of the diversion facility and pipeline under the highway. This authorization must be submitted to the Department of Ecology prior to any construction.

According to Pend Oreille County, a Long Plat would be required for this development. The property will require local county SEPA for the rezone of the property from Timber Classification to add a five lot subdivision. The local SEPA, rezone and Preliminary Plat/Plat approval must be obtained prior to any construction of the diversion facility.

**Water Use Efficiency**

The water right holder is required to maintain efficient water delivery systems and use of up-to-date water conservation practices consistent with RCW 90.03.005.

**Proof of Appropriation**

The water right holder shall file the notice of Proof of Appropriation of water (under which the certificate of water right is issued) when the permanent distribution system has been constructed and the quantity of water required by the project has been put to full beneficial use. The certificate will reflect the extent of the project perfected within the limitations of the permit. Elements of a proof inspection may include, as appropriate, the source(s), system instantaneous capacity, beneficial use(s), annual quantity, place of use, and satisfaction of provisions.

**Schedule and Inspections**

Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the project location, and to inspect at reasonable times, records of water use, wells, diversions, measuring devices and associated distribution systems for compliance with water law.

This permit shall be subject to cancellation should the permittee fail to comply with the above development schedule and/or to give notice to the Department of Ecology on forms provided by that Department documenting such compliance.

Dated this 27<sup>th</sup> day of March, 2013, at Spokane, Washington,

Department of Ecology

by   
Keith L. Stoffel, Section Manager
